SPRING NEWS

ENJOY THE WARMER WEATHER AND HAVE A GREAT SPRING!

Spring brings on new business opportunities and projects with the winter thaw and there is no better time to make sure your instruments are in peak shape. Get your gear 100% up-to-date and ready for another upcoming season in the field. Contact our service repair for clean, re-lube, calibrations and repairs

DID YOU KNOW: "ACCORDING TO GUNTER"

Edmund Gunter (1581 – 1626), was an English clergyman, mathematician, geometer and astronomer of Welsh descent. He is best remembered for his mathematical contributions which include the invention of the Gunter's chain, the Gunter's quadrant, and the Gunter's scale.

Gunter's interest in geometry led him to develop a method of surveying using trilateration. Linear measurements could be taken between topographical features such as corners of a field, and using trilateration, the field or other area could be plotted on a plane, and its area calculated. A chain 66 feet (20 m) long, with intermediate measurements indicated, was chosen for this purpose, and is called Gunter's chain.

The length of the chain chosen, 66 feet (20 m), gives a unit easily converted to area. Therefore, a parcel of 10 square chains gives one acre. The area of any parcel measured in chains will thereby be easily calculated.

According to Gunter, used as a phase....

Indicates and/or emphasizes that something is correct, right, or reliable, in reference to Edmund Gunter. Considered the American equivalent of the British phrase, "according to Cocker." Example: "Now that I've measured this point with my R10-2 five times, I am quite sure it's free of errors and completed according to Gunter!" (Thanks to our own Tom Bryant, PLS for this article)

DID YOU KNOW...

SEILER HAS APPROVED STATE CONTRACTS FOR QUANTITY PURCHASES WITH WISCONSIN, NEBRASKA AND INDIANA DEPARTMENTS OF TRANSPORTATION?

Note: Pricing on these contracts extends to counties, municipalities or other Governmental bodies.

Wisconsin #395002-M18-0510086-000-01
Indiana QPA #29424
Nebraska 15063OC

JUST A REMINDER...

Our 2019 Photo Contest is in full swing! See our website for details and how you can submit and WIN.

GET TO KNOW US!

Meet Joe Madej

Joe is based out of our St. Louis office and he handles all the mapping and GIS tech support/training for the southern half of our Seiler Midwest territories.

Joe has been with the Seiler team for four years and has a Bachelor's degree from Southern Illinois University - Edwardsville in Science, with specialization in GIS. Joe has an adorable 11 month old son named Maverick and a beautiful wife, Amy who is a teacher and artist. In his free time, Joe likes to run around chasing his son, and also run for sport. He has completed five (5) half Marathons and is an avid St Louis Blues fan! If you need technical support for Mapping GIS or would like to set up some custom training for you or your staff please contact him at: 314-348-9852 or jmadej@seilerinst.com.

UPCOMING EVENTS AND SHOWS

Seiler will be exhibiting, hosting and guest speaking across the Midwest this spring and upcoming summer! We have some Spring GIS Workshops across the Midwest coming soon near you.

Don't miss them - **Register Soon!**

2019 Mapping/GIS Spring Showcase

- April, 11 2019 - Indianapolis, IN (See you next year!)
- April, 18 2019 - Wheaton, IL (See you next year!)
- May, 2 - Ames, IA
- May, 9 - Menomonee Falls, WI
- June, 4 - Mission, KS

Coming soon: Ames, IA | Menomonee Falls, WI | Mission, KS | St. Louis, MO
Thanks for attending Indianapolis and Wheaton, IL

Seiler is exhibiting:

Missouri MSPS Spring Conference

- May, 3-4 2019 - St. Louis

Kansas Municipal Utilities KMU Conference

- May, 8 2019

Seiler Presenting:

Ruekert-Mielke Seminars - Seiler Presenting

- April, 24 2019 - Waukesha, WI

Find more places we will be this Spring on our events page!

Don't forget to register at www.seilergeo.com/events
