# ADVANCED USV FOR BATHYMETRIC SURVEY

APACHE 3 Pro is a compact professional USV for autonomous bathymetric surveys in shallow waters. Its double-layered, all-carbon fiber hull is impact resistant and unsinkable. The APACHE3 Pro's IP67 dust and waterproofing secures onboard instrumentation throughout survey and mapping projects, regardless of operating conditions. By combining a semi-recessed propeller and a hull with optimized hydrodynamic performance, the vessel's speed of up to 7m/s allows for accurate measurements even in rivers with strong currents.

Professional grade GNSS RTK + inertial navigation provides high accuracy measurements even when GNSS signals are temporarily interrupted, for example under a bridge. The built-in CHCNAV D270 echo sounder always provides the most reliable and accurate depth measurements thanks to the real-time correction of water sound velocity in function of water temperature.

The 4G network modem enables data transmission anytime, anywhere. The GNSS PPK post-processing backup capability ensures accurate positioning in areas where 4G network is not available. The APACHE 3 Pro smart power management maintains a regular battery discharge and supports battery hot swapping for continuous measurements around the clock.
